

The Integrated Fax Solution

Automate Critical Business Communications

Maximizing and streamlining day-to-day business operations is crucial to gaining – and maintaining – a competitive edge in today’s fast-paced corporate environment. VSI-FAX delivers a comprehensive client server and server-based solution that fax-automates all your critical business applications and communications. By employing VSI-FAX integration technology to eliminate inefficient paper-centric communications and processes, businesses can substantially increase productivity and reduce costs.

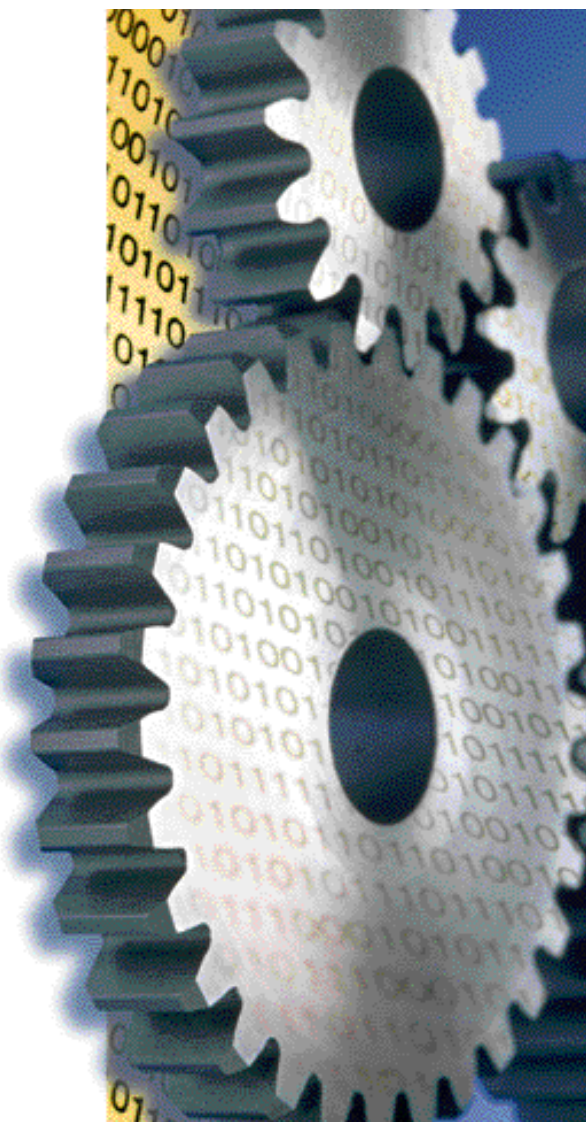

VSI-FAX is the complete solution for fax-enabling all business operations

Seamless Integration and Fax Automation

VSI-FAX connects your information infrastructure directly with the outside world by fax enabling desktops and fax automating processes that normally require printing, manual faxing and postage. The VSI-FAX Integrator’s Toolkit enables the Integrator, Value Added Reseller (VAR) and IT professional to integrate fax into any application enabling faxing of any document from any application – automatically. Or automate workflow and paper-centric operations by combining your application’s conditional business rules with VSI-FAX integration and routing capabilities.

Centralized Management

While extremely powerful and versatile, VSI-FAX is also easy to install and maintain. Administration is fully scalable – from a single user, to a workgroup, to an entire enterprise. Using the VSI Microsoft Management Console Fax Administration, system administrators can manage user profiles, VSI-FAX licenses, directories, modems, fax boards, cover pages and Direct Inbound Dialing (DID), as well as gauge the usage and wellness of all servers. Plus, quickly setup and manage least cost routing (LCR) tables.

Key Benefits

- Fax any document from any application
- Print-to-fax from any Windows application
- Enables email to fax & fax to email
- Eliminates fax machines
- Eliminates envelopes and postage
- Reduces telephony cost
- Works with existing applications and networks
- Eliminates routine manual paper transactions
- Automates internal and external paper communications & transactions

New Version 4.1

For Windows NT/2000, Unix and Linux

VSI-FAX™

New Version 4.1

Fax Any Document from Any Application – Automatically

The power of VSI-FAX lies in its ability to fax any document from any application running on Windows NT/2000, Unix or Linux platforms. Data from any source can be overlaid onto any business form and faxed as a finished document, allowing organizations to automate workflow processes and become truly commerce-enabled. Also, VSI-FAX works with most forms packages to enable routine faxing of standard documents and forms.

Integrator's ToolKit

Today, computer-based faxing means more than faxing a Word document from a desktop. The Integrator's ToolKit provides tools to fax enable any application and automate paper centric communications – almost anything that was printed can be faxed. Fax from any email client, route faxes directly to desktops, departments and printers. VSI-FAX Integrator's ToolKit includes a comprehensive Software Developers Kit (SDK), robust Command Line interface, Autosend directory, XML-F DTD, (VSI-FAX) print driver and fax-to-email integration tools. VSI-FAX also provides many samples for common integrations techniques used by most businesses.

Desktop Clients

VSI-FAX powerful clients guide you intuitively through all sending, receiving, statusing and fax management tasks.

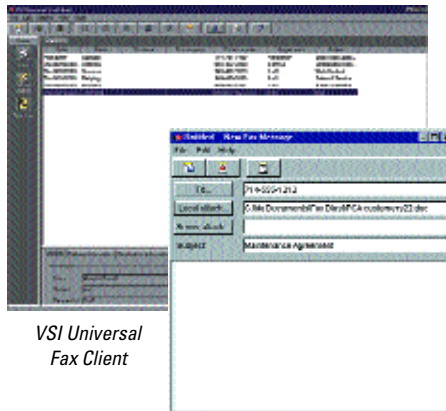

VSI Universal Fax Client – The VSI Universal Fax Client gives you the best of a thin-client and the power of a client server application. Easy to install and self-updating.

VSI Outlook Fax Client – The VSI Outlook Fax Client gives you the power to send, receive, status and manage faxes directly from Microsoft Outlook.

VSI Web Fax Client – The VSI Web Fax Client is a browser-based client that enables fax sending, receiving and viewing capabilities from virtually anywhere in the world.

Increase Productivity and Reduce Costs

The strategic use of VSI-FAX powerful integration tools and intuitive desktop clients eliminates less efficient communications, and corporations worldwide are seeing tremendous returns on their fax technology investments. VSI-FAX automates repetitive business communications, enables the entire corporation to automatically send, route, archive and process all paper-centric communications. VSI-FAX delivers the integration and desktop capabilities that will help your company dramatically reduce both labor and telephony cost.
